New PLATH Intelligence Workshops in 2011 and 2012

Hamburg, 2011/10/19 –

At the 16th annual Shephard Electronic Warfare conference, hold in May 2011 in Berlin, Germany, PLATH presented a COMINT day in partnership with Shephard Media Group, which was a big success and the beginning of a longstanding relation.

For this reason, both PLATH and SHEPHARD have agreed to continue this strategic cooperation for the upcoming EW conferences in Asia (Singapore), Europe (Rome) and Middle East (Riyadh).

At EW Asia in December 2011 PLATH will sponsor an intelligence workshop. The main topics are the evaluation of mass-data and the integration of COMMS-ESM and RADAR-ESM onboard navy ships.

PLATH GmbH is the leader for providing EW and communications intelligence solutions. Our innovative systems cover the complete intelligence cycle “from sensors to knowledge” including: direction finding, locating, monitoring and analysis of communication signals, evaluation and visualisation of mass data as well as jamming and deceiving. For more than 50 years PLATH has been shaping the future of intelligence.
